1, Package Content.

- 1 x EDC Flashlight
- 1 x USB Charging Cable

Tips: When you receive your package, please check the package content at the first.

2, Install Battery

Because it is a built-in battery, no additional power supply is required.

3, How to use the product

With three light sources - white light, yellow light and 365nm UV light- you can switch between them at the touch of a button to suit your needs. The little focusing tip at the end can be removed and mounted on the lamp head to realize the spotlight effect.

The little focusing tip at the end can be removed and mounted on the lamp head to realize the spotlight effect.

4, How to charge the battery

The charger is USB charger, you can charge it from computer, power bank, car or power adapter.

Charging Indicator

Red: Charging

Light Off: Fully charged

It will take 2~3 hours to be fully charged.

Tips: When the flashlight battery is too low (the light is dim), it is recommended that you charge it in time to avoid damage to the battery caused by over-discharge.

5. Application.

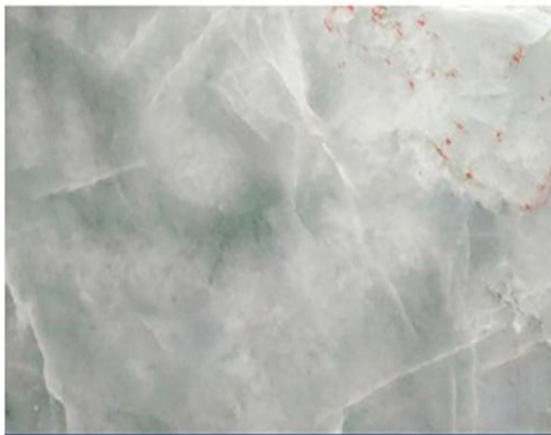

White light source, strong penetration, suitable for identification of jade with thick skin

Under normal Light

Observed under yellow light

Under normal Light

Observed under yellow light

Yellow light source is close to natural light, no reflection when irradiated, conducive to the naked eye to observe the color of jadeite.

Fluorescent substances within the object will emit fluorescence under the irradiation of ultraviolet light, using this principle, 365nm ultraviolet light can be widely used in jade or gemstone identification, search for minerals, rocks hunting, pet urine examination, banknote authenticity identification and so on.
