When you receive your package, please check the package content at the first.

(Tips: Please remove the insulation film of the battery before use)

2, Install Battery

Please refer to the image above to install the battery.

The Battery Polarity: Battery (+) goes in first, Battery (-) is close to the bottom.

It's recommended that use the included battery to power the flashlight.

3, How to use

Power Button

Press heavily the power button to turn on/off the flashlight

4, How to charge the battery

Support USB Rechargeable, you can charge it from the computer, power bank, power adapter or car.

The charging port is USB-C port, compare with the micro USB, the USB-C port is reversible, any way you plug in is the right way. It's convenient for daily us and not easy to damage the port.

Please pay attention to the Polarity before installing the battery. The positive pole is close to the LED lamp, the negative pole is close to the end of the flashlight.

Charging Indicator:

Red: Charging

Green: Fully charged

Charging Time: 4~6 hours

Working Time: 4~6 hours

5. Function

Fluorescent substances can emit light under ultraviolet light, using this principle, this product can be used for banknote authenticity detection, pet urine detection, mineral detection, etc.

You just need to turn on the UV flashlight and point the UV light at the items to be detected, such as banknotes, minerals, etc..
