SV57 UV Flashlight

1, Package Content.

1 x 365NM UV Flashlight

1 x USB cable

When you receive your package, please check the package content at the first.

(Tips: It is recommended to charge the flashlight before the first use, because some flashlights stored in the warehouse for too long will cause the battery to run out.)

2, How to use

Press heavily the power switch to turn on/off the flashlight

3, How to charge the battery

Built-in rechargeable battery

It supports USB direct charge, no extra charger is required, you can charge it from the power bank, computer, car, or power adapter

There is a charging indicator that tells you when the battery will be fully charged.

Charging Indicator/Power Button(Charging Requirement: 5V-1A)

Charging: Red light

Fully charged: Light off

Charging Time: 2~2.5 hours

Tips: When the flashlight battery is too low (the light is dim), it is recommended that you charge it in time to avoid damage to the battery caused by over-discharge.

4. Function

Fluorescent substances can emit light under ultraviolet light, using this principle, this product can be used for banknote authenticity detection, pet urine detection, mineral detection, etc.

You just need to turn on the UV flashlight and point the UV light at the items to be detected, such as banknotes, minerals, etc..
