2, Install Battery

Please refer to the image above to install the battery.

The Battery Polarity: Battery (+) goes in first, Battery (-) is close to the bottom.

It's recommended that use the included battery to power the flashlight.

3, How to use

Press heavily the power button to turn on/off the flashlight

4, How to charge the battery

Come with 5000mAh high-capacity li-ion battery. The included battery can provide sufficient power output of 10W for this flashlight.

It supports USB direct charge, no extra charger required, you can charge it from the power bank, computer, car, or power adapter

The power strip and power adapter are not included.

There is a charging indicator that tells you when the battery will be fully charged.

Charging Indicator

Red: Charging

Green: Fully charged

Charging Time: 5~7 hours. Working Time: 4~6 hours.

5. Application.

Fluorescent substances can emit light under ultraviolet light, using this principle, this product can be used for banknote authenticity detection, pet urine detection, mineral detection, etc.

You just need to turn on the UV flashlight and point the UV light at the items to be detected, such as banknotes, minerals, etc..
